

MAXIMIZING HEALTH CARE AND QUALITY OF LIFE

Our mission is to maximize patient outcomes, enhance their quality of life and ensure appropriate navigation of the health care in an increasingly challenging environment.

For patients who are concerned about prevention, managing a chronic sickness, have a new health issue, or need in home support, our expert team is by your side every step of the way.

"We are so grateful for our Maximum Medical Solutions team. They anticipated every need we would have had. They helped with finding second opinions, visiting rehab centers before surgery, setting up supplies at home and managing the follow-up appointments. We went into surgery confident and well prepared. We came home to everything we needed for a fast recovery from a medical bed to ice cream."

SERVICES

ONGOING HEALTH CARE MANAGEMENT

- Manage appointments, testing, medications and follow-up appointments.
- Clarify the complex web of health care decisions.
- Assist in the assessment of risks and benefits of a treatment option.
- Health insurance guidance.

NEWLY DIAGNOSED CONDITION RESEARCH

- Aid in the understanding of newly diagnosed health issues, including surgeries, cancer, heart conditions, diabetes, stroke and more.
- Research physicians and set up second opinion and specialty doctor visits.
- Plan for the optimal outcome including treatment and long-term care needs, choosing rehabilitation or care centers, clinical trial access, in home medical devices and more... before it is needed.

IN-HOME SUPPORT

- Allow for a quicker return home after an injury or hospital stay.
- Ongoing care for the elderly, chronically ill, or frail who wish to remain in-home rather than move to a nursing home.
- In-home care for hospice support.
- Available for 1-24 hours a day.
